PUSH-OPEN HEAVY-DUTY LIFT-UP DOOR SYSTEM

TCH-311011 023.T

Features

- Free-stop functionality.
- Push-to-open operation.
- Adjustable opening angle between 85° - 100°.
- Opening and closing force adjustment.
- 3d adjustment capability.
- No hinges required.
- Compact, space-saving design.
- Compatible cabinet dimensions.
  - Height: (10") 250 mm to (32") 800 mm.
  - Front weight: (2.6 lb - 40.0 lb) 1.2 kg - 18.4 kg.
- Sold as a set.

Color options

Dark Gray

Light Gray

White

Usage Recommendations

SKU	LF-Based Selection		Weight-Based Selection					
	Cabinet Height	LF	Cabinet Height (KH)		Front Weight (LB)		Front Weight (KG)	
			IN	MM	Min.	Max.	Min.	Max.
TCH-311011 023.T.L	10" - 20" 250 mm - 500 mm	52.1 - 130.2 in-lb 600 - 1500 mm·kg	10	250	5.3	13.2	2.4	6.0
			12	300	4.4	11.0	2.0	5.0
			14	350	3.7	9.3	1.7	4.2
			16	400	3.3	8.2	1.5	3.7
			18	450	3.1	7.3	1.4	3.3
			20	500	2.6	6.6	1.2	3.0

			28	700	12.6	26.0	5.7	11.8
			32	800	11.0	22.7	5.0	10.3

Note:

Door weight is calculated using a standard density factor of 0.00000072 (Metric: 720 kg/m^3 | Imperial: = 0.026 lb/in^3). Values shown are estimates and should be verified against the actual door weight for final product selection.

Key Definitions:
- KH = Cabinet Height.

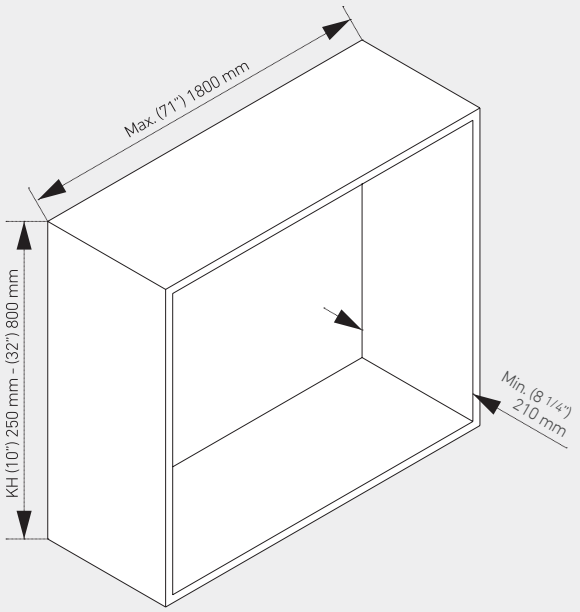

Lift Force (LF) Formula:
- LF = KH x Door Weight

Model Selection Criteria:
- If the LF value falls within an overlapping range, always choose the larger model to ensure optimal performance and longevity.
- If the LF falls outside the standard range, a customized configuration is recommended to meet your cabinet's specific requirements.
